DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 (in part) and 12-28, drawn to compounds, compositions and methods comprising an ER β -selective ligand as defined by formula (I) found on page 11 of the present specification, classified in class 568, subclass 663+.
 - II. Claims 1-4 and 6-11 (in part), drawn to a method of regulating fertility utilizing an ER β -selective ligand not defined by formula (I) found on page 11 of the present specification, classified in class 540+, subclass 1+.
 - III. Claim 5, drawn to a method for treating ovarian failure associated with aging utilizing an ER β -selective ligand not defined by formula (I) found on page 11 of the present specification, classified in class 568+, subclass 663+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II/III are unrelated because they encompass different compounds. Inventions II and III are unrelated because they are drawn to different treatment methods.

Art Unit: 1616

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for the other Groups, restriction for examination purposes as indicated is proper.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from under the elected Group for search purposes, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 1616

Other Matters

6. The examiner notes that several calls were made in order to resolve the issue of the instant claims in order to place the application in condition for allowance.
